700⁺

Alumni

300⁺

Students

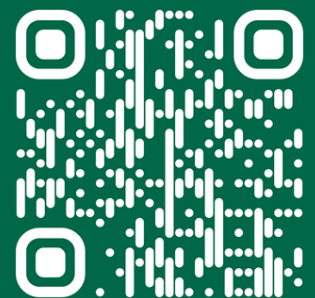

184

Faculty

By bringing multiple parties to the table, including members of the international business community in Tampa Bay and abroad, the USF Global Networks program is expanding our reach and maximizing the benefits of network membership for all. For current students and alumni, USF Global Networks can offer international learning, internship, scholarship, and job opportunities, as well as entrepreneurial and research collaborations. For the international business community, Global Networks offer a relevant audience, a top talent pool, professional collaborations, advertising and marketing, subject matter expertise, and more. USF Global Networks are also a platform to highlight the University's impact internationally – showcasing and supporting the amazing research and successes of our faculty and alumni around the world. For community partners, belonging to a USF Global Network is an exciting way expand personal and professional connections in a particular part of the world and collaborate with USF in an organized and systematic way.
